**The
Telecommunications
Sector**

Made by: Bawang, Mehalah

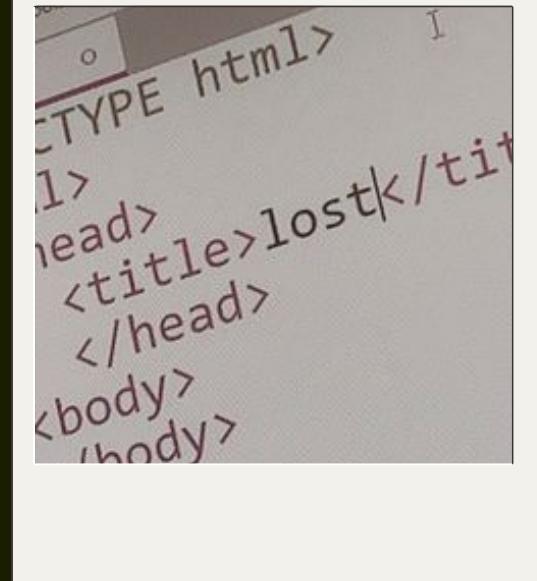

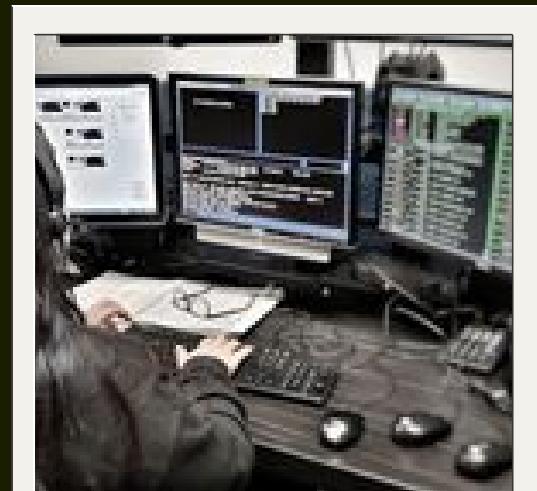

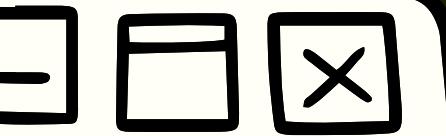

- □ ×

Under the world of ICT...

there are many sectors and businesses we can identify, where numerous people work under it as their form of livelihood.

One of which is **telecommunications**.

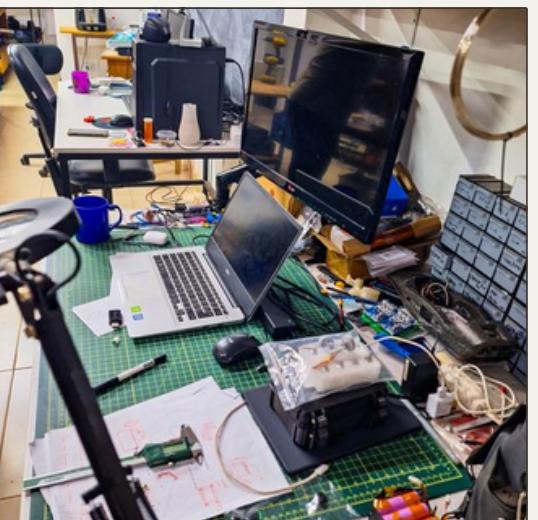

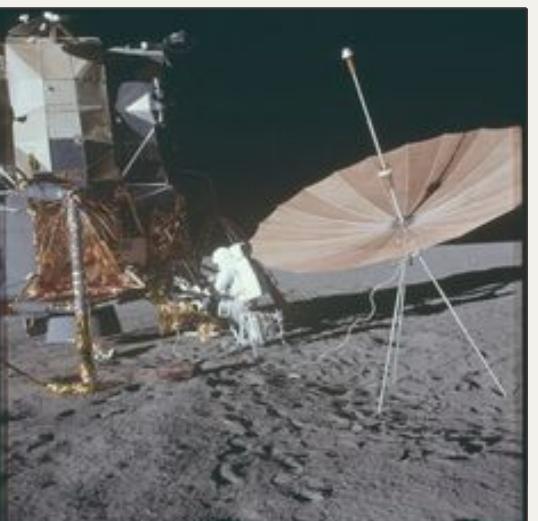

Telecommunications

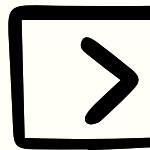

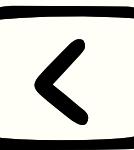

What is it?

Telecommunications, also known as “*telecom*,” is the exchange or transfer of information over short or long distances by electronic means.

- It includes all types of voice, data, and video transmission.
- It includes a wide range of information-transmitting technologies and communications infrastructures.

Examples include:

Wired Phones

Cellphones

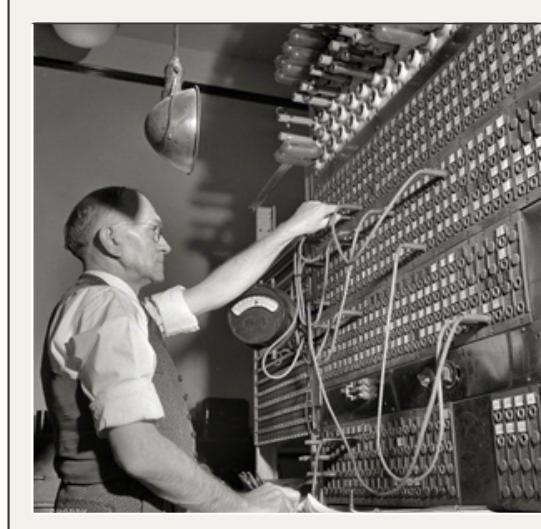

Satellites

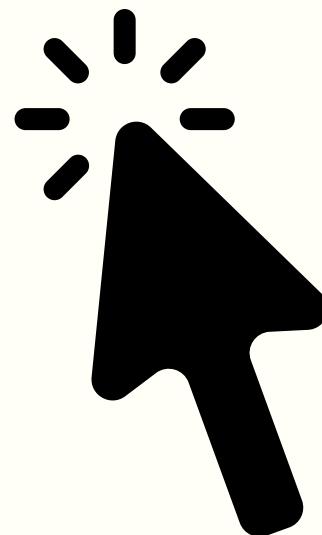

Television Broadcasting

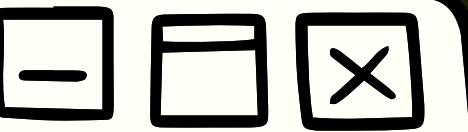

Internet

Telegraphs

Under telecommunications...

there are certain businesses which play a crucial role in connecting with people, facilitating communication, and driving economic and social development.

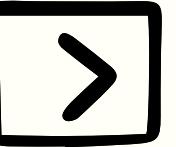

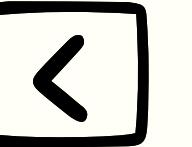

Some of these businesses include:

Philippine Long Distance Telephone Company (PLDT)

PLDT Inc. is one of the Philippines' largest and most established telecommunications companies.

- In the industry, PLDT provides a wide range of services, including fixed-line, wireless, and broadband connectivity through its various subsidiaries like Smart Communications.
- The company plays an important role in the digital landscape of the Philippines, offering essential services that connect millions of Filipinos.

Converge ICT

CONVERGE
